clearing reports on gas markets
cleared by KELER CCP

1 June, 2025

I. Introduction

In 2020 KELER CCP Ltd. (KELER CCP) initiated the harmonization of the closing processes of the cleared gas markets (financial settlements converted to EUR, consolidation of purchase prices, consolidation of purchase price invoices) and the improvement of the transparency of reports (new gas market reports were introduced in August 2023).

In the summer of 2024, Balkan Gas Hub EOD (BGH) and KELER CCP Ltd. (KELER CCP) signed a cooperation agreement on providing central counterparty services on BGH spot and forward gas markets, starting from 1 July 2025. With the clearing of new gas markets, the clearing reports are affected and the value set implemented in the reports are to be extended.

This client information contains all information related to the gas market reports in a single, consolidated format.

- Consolidation of purchase prices

All purchase prices related to the new BGH gas market settlement mentioned above, altogether with all currently cleared gas markets, will be merged into a single financial transaction, i.e. a clearing member will have only one purchase price settlement item per day for all markets. The PRD and PRS reports provide comprehensive information on the content of the combined purchase price.

- Consolidation of purchase price invoices

As with the purchase prices, the purchase price invoices are also issued as one combined invoice, with the extension of BGH gas markets, thus a combined book of invoices will be also issued. With the exemption of balancing neutrality surcharge fee as determined by FGSZ Ltd., that are subject to independent book of invoice.

- Gas market reports

The extended clearing reports with BGH markets' set of values are presented in detail below. The first daily reports will be published on 01.07.2025.

II. Gas market statements

Reports generated by KELER CCP contain data for all cleared gas markets in one single report.

The aim of the statements is to provide transparent and comprehensive data, that are easily processed on client side. For this purpose, during the development of the reports, frequently asked questions and requests of clients and the way in which the statements are used by clients were taken into account.

Currently three types of reports are provided. Both detailed and summary statements are prepared for each report types for each clearing date, the latter will contain the summation of the data of the detailed report according to certain criteria. From the detailed and summary reports of all three

types, a monthly report is prepared once a month (on the 4th clearing day of the month), which contains the data of the previous month's daily reports in a single file. The series of reports is completed by the occasional confirmation of collateral assets statement, which is generated when there is a change in the collateral assets.

Hungarian name of the report	English name of the report	Abbreviation	Frequency
Kereskedési és pozíciós részletező kivonat	Trade and Position Details	TPD	Daily / Monthly
Kereskedési és pozíciós összegző kivonat	Trade and Position Summary	TPS	Daily / Monthly
Pénzügyi és rekonsziliációs részletező kivonat	Payment and Reconciliation Details	PRD	Daily / Monthly
Pénzügyi és rekonsziliációs összegző kivonat	Payment and Reconciliation Summary	PRS	Daily / Monthly

Possible values of Comment field

In addition to the data in the summary report, the values of the Comment field provide information about what data or aggregation the record contains. The PRS report contains a multi-level aggregation. The table below shows what these are through an example. The ranges marked with different colours give the same values per range. The ClearingMember Payment Amount row sum represents the purchase price to be paid by the clearing member on SettlementDate. The TradingParticipant Payment Amount contains an aggregation by trading ID. The following rows (Invoice Number available in Monthly Report, Daily Net Variation Margin) represent the breakdown of the purchase price settlement per invoice, where the relevant invoice number is already displayed in the monthly statements, furthermore the Daily Net Variation Margin shows the part of the purchase

price item that is not subject to invoicing. Finally, the last rows provide aggregations by market and transaction type combinations. The item-by-item details of the aggregated data can be found in the PRD statement.
